Subject: Status of submission of ERG work plans and cost estimates

Hi Patrice, Terry and Terry,

As you will see in your inbox, ERG has submitted work plans and cost estimates for 14 of the 15 SOWs we have received thus far. The only outstanding one is the 13th we received: PR-R2-19-00427 "Diamond Alkali-Lower Passaic River Allocation." Our work plan and cost estimate are all set to go to you for this one as soon as we receive the subcontractor's signed COI form. The subcontractor is aware of the urgent need to send us this form, but likely was delayed in being able to provide it due to various key staff having left early for the holiday weekend. They understand the urgency and we anticipate receiving this form from them tomorrow. As soon as we have it, we will press "send" on the email we have already prepared to provide this last work plan and cost estimate to you.

Jan
